DETAILED ACTION

Claim rejections – 35 USC § 112

Claims 33, 35-39, 42, 43, 45-47, 51, 52, 55, 56, 58-60 and 62 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention for the following reasons:

It is not clear what apparatus structure is intended by the limitation "a meat emulsion" (recited in claim 33), the temperature limitation (recited in claims 35-37, 42, 45 and 46), the time limitation (recited in claims 38 and 43), the limitation "rapid" (recited in claim 39), the limitation "an ambient condition" (recited in claim 47), the flow-rate limitation (recited in claims 51, 52, 55 and 56), the product-width limitation (recited in claim 58), the product-length limitation (recited in claim 59), the limitation "being rinsed" (recited in claim 60), and the limitation "steam or hot water" (recited in claim 60). Note that the limitations recited in the above-mentioned claims are method limitations and thus they fail to further limit the subject matter of the previous apparatus claim in terms of positive structure.

Claim Rejections- 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4, 8, 13, 15, 16, 32, 33, 35-39, 42, 43, 45, 46, 48, 58, 59, 61 and 62 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Moule (U.S. Patent No. 4,294,858). Moule shows all the method steps set forth in claims 1, 2, 4, 8, 13, 15 and 16 and all the structural elements set forth in apparatus claims 32, 33, 35-39, 42, 43, 45, 46, 48, 58, 59, 61 and 62 (see especially Figures 1 and 3 and column 3, line 42 through column 5, line 50).

Claim Rejections – 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3, 5-7, 9-12, 14, 17-26, 28-31, 34, 40, 41, 44, 47, 49-56 and 60 are rejected under 35 U.S.C. 103(a) as being unpatentable over Moule (U.S. Patent No. 4,294,858). It is not deemed that the features variously recited in dependent claims 3, 5-7, 9-12, 14, 17-26, 28-31, 34, 40, 41, 44, 47, 49-56 and 60 would define unobvious subject matter over the teaching of Moule in the absence of any new or unexpected results. The features recited in these dependent claims are considered to be obvious matters of routine optimization or structural design well within the skill of an ordinary artisan in the field of food technology.
